**Errata**

The panels for math and reading achievement are reversed for Figures 3.1 and 3.2 (pp. 58, 60). The correct figures appear on this errata sheet.

Also, in the “Home Demographics” section of the appendix (page 88), the number of older siblings variable is collapsed into four groups: no older siblings, one older sibling, two older siblings, and three or more older siblings. Finally, endnote five should refer to Figures 3.1 and 3.2, not 2.1 and 2.2.
